2.5-Ton Heat Pump

Unionaire new Ceiling/Floor split system is designed to provide high quality, economically and reliable cooling or heating for a large variety of applications.

A Ceiling/Floor split system consists of an outdoor unit located outside the space to be air conditioned and an indoor unit located inside, both units are connected by refrigerant piping and control wiring.

- + Very elegant design
- + Ultra quiet operation
- + LCD wireless remote
- + "Dry" mode reduces water vapor by computerized dehumidification
- + "Sleep" mode provides a suitable energy saving environment
- + 24 hour programmable timer

- + Automatic and manual selection of 3-stage fan speed
- + Efficient, easy accessible and cleanable air filters
- + Electronic system provides 3 minute anti short cycle protection for the compressor
- + Modern cabinet design

Applications:

- Schools/Universities
- Churches
- Warehouse
- Hospitals/Clinics
- Exercise Facility
- Factories
- Restaurant Kitchens
- Music Studios
